

The parent of an OCTC client is working on bringing an adapted baseball program for people with disabilities (physical and/or developmental) to the Ottawa area. This program originated in the US and was recently established in Amherstburg, near Windsor. Here is a website with more information about that program: <http://www.amherstburgmiracle.com/>

She needs to gather a list of families who may be interested in participating in this program, or at least get an idea of how many people are interested, so that she can begin to approach potential sponsors.

If you know of any clients who may be interested in this type of recreation opportunity, can you please share this email with them? They should contact Michelle Desrochers at mustang14@sympatico.ca if they are interested.
